

Automotive LED Driver TS19503CB10H TS19605CA20H

The TS19503CB10H and TS19605CA20H are high-performance LED drivers for a range of applications, including automotive lighting. Both support a wide input range (4.5V–75V) and feature advanced protection like UVLO, SCP, and OTP. The TS19503CB10H is an inductive step-down converter, delivering up to 2A and over 25 watts of power, with DIM input for flexible control. The TS19605CA20H is a three-channel linear driver with analog and PWM dimming, offering 150mA per channel, extendable to 400mA with external components, making it ideal for automotive lighting.
