

TSHA2101CQ

Integrated AMR (Anisotropic Magnetoresistance) Magnetic Sensor

The TSHA2101CQ is an AMR (Anisotropic Magnetoresistance) based magnetic sensor, when combined with a magnet, it becomes a non-contact switch with low power consumption, high sensitivity and high reliability device.

It is produced with SIP (System in Package) technology, which combines an AMR sensor & ASIC in one IC. It supports both 2-wire & 3-wire applications for cylinder position detection.

IC & PACKAGE

FEATURES

PCB SPACE SAVINGS

OPERATING TEMPERATURE
-40°C ~ 105°C

OUTPUT OVER-CURRENT
PROTECTION

-30V REVERSE POWER
SUPPLY PROTECTION

HIGH INTEGRATED SOLUTION

APPLICATION

A horizontal magnetic field parallel to the electrode of the package can be detected by an arbitrary polarity.

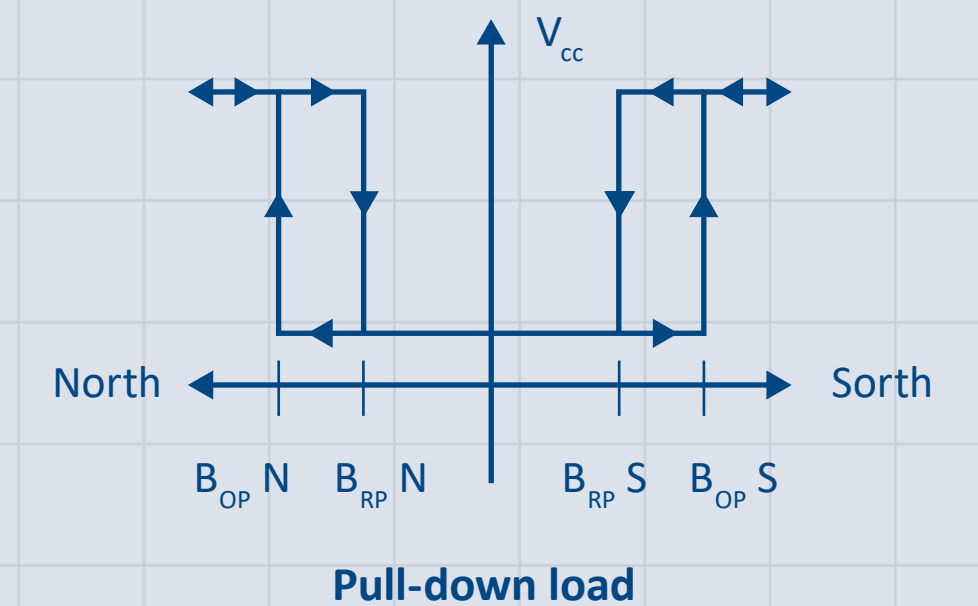

FACTORY
AUTOMATION

ROBOTICS

DETECTION OF SWITCHING FUNCTION

TSHA2101CQ can be used in both pull-up load and pull-down load applications.
